

Product Sheet

DILUTION SYSTEM

ez+fil™ MC

Simplify Product Dilution Across All Your Operations

Designed for today's environments, where labor challenges, staff turnover, and quality standards are constantly evolving, the EZ+FIL™ portable dilution system offers a simple, reliable, and efficient solution for diluting cleaning and sanitation products.

With no complex installation or extensive training required, it delivers consistent results, simplifies operations, and enhances team safety.

Recommended for:

Hospitals and healthcare facilities

Retirement homes

Schools and other public facilities

Hospitality and food service

Commercial and industrial maintenance

SANI MARC™

WOOD WYANT™

Subsidiary of Sani Marc Group

Dilute Your Products Without Constraints.

No installation. No errors. No compromises.

In day-to-day operations, dispensing cleaning products should be simple. Instead, it often becomes a source of complexity and a daily challenge:

- Limited access to dilution stations
- Incorrect dosing and inconsistent results
- Staff shortages, increased pressure on teams, and training challenges
- Operations becoming more complex due to multiple systems

As performance, safety, and compliance requirements continue to rise, EZ+FIL™ enables standardized practices while simplifying daily tasks.

Certified ASSE 1055 - 2023 -
ANSI/CAN/IAPMO/ASSE

Chemical Dispensing Systems with
Integral Backflow Protection.

Even More Reasons to Choose EZ+FIL™

EZ+FIL™ is a complementary solution to wall-mounted dilution systems, designed to offer greater flexibility where it's needed the most.

Mobility

A portable solution designed for all areas and confined spaces.

→ Easily fill bottles, buckets, and equipment wherever needed

Simplicity

No installation required. No complex configuration.

→ Quickly ready to use—just connect it to a water source on site

Control and Precision

Accurate dilution through an integrated system.

→ Fewer errors and consistent results to meet your compliance standards

Operational Efficiency

Intuitive and easy-to-use system.

→ Minimal training required and quick adoption by teams

Safety

No contact with concentrated products thanks to a sealed system and preconfigured dilution settings.

→ Lower risk for employees and surface protection wherever needed

Reduced Operational and Logistics Costs

No maintenance required compared to wall-mounted dilution systems.

→ Eliminates equipment, parts, and maintenance costs

Controlled dosing, reduced transportation and packaging compared to ready-to-use products.

→ Reduces waste, overconsumption, and cost per use

1 x 3 L EZ+FIL™ bottle
(222 g of plastic)

At least 48 x 1 L
ready-to-use bottles
(3,600 g of plastic)*

* Based on one of the least concentrated products in the EZ+FIL™ range: Vert-2-Go Saber 1:15

Versatility and Ease of Use

EZ+FIL™ easily connects to a water source and lets you prepare, dilute and dispense cleaning and sanitation solutions in just a few simple steps. Quickly fill:

Ready-to-use bottles

Buckets

Autoscrubber tanks

Operating Conditions

For optimal performance, the EZ+FIL™ portable dilution system should be used with water pressure between 30 and 50 psi. It is also essential to use the water connection hose.

End of Life and Recycling

Once the container is empty, remove the clear nozzle. Recycle all components in accordance with applicable local regulations**.

** Recycling and recovery options for this packaging depend on the capabilities of local sorting facilities and the programs available in your region. Please check the applicable recycling guidelines in your area, particularly for containers made from multiple types of plastics that cannot be rinsed after use.

What if you could optimize your operations today?

Every environment comes with its own operational realities. Choosing a dilution solution should never be left to chance.

Our experts work with you to assess your needs and recommend the best combination of solutions for your facilities. We help you compare options and identify real gains in performance, safety, and cost.
